

K-Love has a powerful impact on our community for the quality and content of the music and information broadcast accross the airwaves. It is by freedom that we live in the USA and it is by freedom that we must continue to have choices of what our children and families listen to. Displacement of FM by LPFM will hinder the privilege we as a family have to choose what we tune to. Please consider what impact this decision will have. If you wonder what negative impact the music and message of other stations have ask East Palo Alto who just requested that an evangelical ministry come to help them deal with the violence and deterioration in their community. They reported that they have tried every conventional law enforcement, self-esteem building method known and now wish to go to God for the guidance and aid that will change this city. Please know that KLOVE is a great station that provides wonderful peace and hope to many in this nation. Please preserve our ability to tune to 102.7 for this refreshment. Thank you!
